Face Recognition using Haar Cascades

Please, send screenshot of your own photo (face detected) using training of data from face_D.py, faceR.py & faceDETECTOR.py

1. Use face_D file in order to scan your faces several times
2. Use faceR.py file to do train your PC. Note that it creates additional training data based on your face
3. Use faceDETECTOR.py file to detect your face

Face Recognition using Haar Cascades

Note:

1. Please create folder facesData folder to hold your scanned photos
2. Please Change id name from “your name” to your name or nickname in faceDETECTOR.py file

Face Detection using Haar Cascades

Please send e-mail indicating
Computer Vision - Assignment 5
Your Surname & Name
